ABOUT ME

A sophomore Computer Engineering student with a strong interest in software development, seeking an internship to gain hands-on experience. Has a solid foundation in Front-end, Back-end, and Database development. Possesses strong analytical and problem-solving skills, with the ability to propose clear and effective solutions. Highly motivated to continuously improve technical skills through hands-on practice and real-world projects.

EDUCATION

Srinakharinwirot University

Computer Engineering (Year 2)

2024 - Present

GPAX: 3.83/4.00

PROJECT

SugarFulit (Android Application)

2025 - Present

An Android application that provides information on sugar content in fruits to support diabetic patients and people who want to control their sugar intake, developed using Java, XML, and Android Studio.

- Designed and implemented UX/UI
- Responsible for full-stack development of the application

BrainFit (Mobile Application)

2025 - Present

A mobile application developed to help reduce the risk of Alzheimer's disease.. Built with React Native, JSX, and using Google Sheets API as the data storage system.

- Developed the application using React Native
- Contributed to UX/UI design to enhance user experience
- Responsible for backend development and supported frontend layout implementation
- Designed the database structure and integrated APIs for data storage and retrieval using Google Sheets API

Grande Galaxy Hotel (Web Application)

2025 - Present

A comprehensive web hotel booking application including online search, booking, and payment systems, as well as a dashboard for managing bookings, room availability, and hotel summaries.

- Participated in UX/UI design
- Responsible for full-stack development of the entire web application
- Designed and implemented the database schema using MariaDB

ADDITIONAL EXPERIENCES

SWU Metaverse

2025 - Present

Participated in the SWU Metaverse Competition to develop and design a virtual environment for Srinakharinwirot University using Unity and Blender. Achieved 3rd place in the competition and was invited to contribute as a participant in Metaverse training workshops.

- Developed the player system using C# in Unity
- Designed and created 3D models of university buildings using Blender
- Imported 3D assets into Unity and optimized scenes for use in a Metaverse environment

FiveM Server Development

2024 - Present

Developed and managed a custom FiveM server, focusing on scripting, UI development, and server optimization to enhance gameplay experience and system stability.

- Developed and customized server scripts using Lua
- Designed and built user interfaces using HTML, CSS, and JavaScript
- Managed and maintained server systems to ensure a smooth gameplay experience
- Performed debugging and troubleshooting to improve stability and performance

SKILLS

Languages: HTML, CSS, JavaScript, Lua, Java, C#, C, Python, XML, Dart

Frameworks: React, React Native, Bootstrap, Express.js, Next.js, Flutter

Database: MySQL, MariaDB

Tools: Figma, MySQL, Unity, GitHub, Android Studio

Graphic Tools: Blender
